ABSTRACT

This sixth annual study of the status of desegregation in Dade County Public Schools focuses on data gathered as of September 1970. The report comprises the following tables: distribution of racial and ethnic groups, pupils and school employees, elementary school centers, junior high school centers, senior high school centers, and special school centers; summary, distribution of racial and ethnic groups, pupils and school employees, K-12 program; racial distribution of employees--Central Administration at Lindsey Hopkins Building, district offices, and countywide services at other locations; racial distribution of students and employees, adult education programs; percent of black pupils by schools and by districts, 1970 vs. 1969; distribution of schools by percent of black pupils in 1968, 1969, and 1970 ranked by percent in 1969; number and percent of black and white teachers in each school, 1970 vs. 1969, ranked by percent black in 1969; and racial composition of pupil population, black and nonblack, by district and countywide, 1965-70. (JM)

Research Reports, 1970-71

- No. 1 - Support of the Dade County Public Schools Through the Minimum Foundation Program
- No. 2 - Sick Leave for Instructional Personnel, 1969-70
- No. 3 - New Teachers in the Dade County Public Schools, 1970-71
- No. 4 - Terminations of Instructional Personnel 1969-70
- No. 5 - Desegregation - September 1970

Additional copies of these reports may be obtained from the Administrative Research Department, Room 201, Lindsey Hopkins Building. (A list of Research Reports published in 1969-70 is printed on the inside of the back cover.)

DESEGREGATION IN DADE COUNTY PUBLIC SCHOOLS
SEPTEMBER 28, 1970

Introduction

This sixth annual study of the status of desegregation in the Dade County Public Schools shows the effect of the speed-up in the Spring and Fall of 1970 in desegregation required of the Dade County school system by the United States Department of Health, Education and Welfare and by Federal Court order to complete plans for "total" desegregation.

This report, prepared by the Department of Administrative Research, contains data to assist school officials in assessing the effectiveness of the desegregation plan and in making adjustments, if necessary, to achieve the balance desired. The report includes the elementary and secondary schools, adult education and all supporting administrative and service departments. It includes tables containing both basic data and various comparisons of pupils and certain employee groups.

The classification of pupils into the several minority groups used in this report are as required by the United States Department of Health, Education, and Welfare in their reports.

History of Desegregation in Dade County

In September 1959, Dade County became the first in Florida to desegregate its schools. (The word "desegregate" as used in this narrative refers to any mix of black and non-black pupils regardless of numbers.) Two schools, Orchard Villa and Air Base Elementary, opened with a total enrollment of 777 including 25 black pupils. From this token beginning, the Dade County Public Schools have experienced considerable change. This year there are 133 elementary, 36 junior high, and 16 senior high school centers having both white and black

pupils; the total membership in these 185 schools on September 28, 1970 was 203,339 including 53,383 black pupils. This includes 83.7% of the 221 elementary, junior high and senior high schools, 89.5% of the black pupils and 84.0% of the white (all non-black) pupils in the regular program.

Rapid changes in community housing patterns quickly converted Orchard Villa to an all-black school but by September 1961, without Orchard Villa, there were eight desegregated schools. At the end of the 1962-63 school year, desegregation began to accelerate and in the fall of 1963 some 42 schools had both white and black pupils. In the first survey on desegregation made by the Administrative Research Department in October 1965, it was found that 92 of the 208 public schools had been desegregated. In these 92 schools were 15,306 or 33% of the black pupils and 82,727 or 53% of the white pupils. By 1967 the number of desegregated schools had increased to 123 of 213 schools including, 30,466 or 56.8% of the black pupils.

In the summer of 1969, after a survey of the school system by a team from the Department of Health, Education and Welfare, orders to speed up the desegregation process were received. A plan to carry out these orders, including some immediate action, was challenged in court by a group of citizens. When the local court ruled against the School Board the case was appealed to the U. S. District Court which ordered that the plan be put into effect; the Federal court also issued speed-up orders which were more stringent than those from the Department of Health, Education and Welfare including complete desegregation of the full-time instructional staff in all schools by mid-year. Consequently, in February 1970 about 2,000 teachers were reassigned to effect a balance in each school to match the black-white teacher ratio in each school's respective grade level. A plan for "total" desegregation of pupils was put into effect in September 1970.

Status of Desegregation, September 1970

Although the reports on desegregation in the Dade County Public Schools have included pupils and employees in all programs and departments of the school system, emphasis has been on pupils in the regular day schools since the primary purpose of the studies has been to determine the extent of racial "mix" between black and non-black pupils in the K-12 program. Consequently, all non-black pupils as well as employed personnel are treated as one classification except where minority groups of pupils (American Indian, Oriental, and Spanish language origin) are shown separately as reported to the United States Department of Health, Education, and Welfare.

Throughout this report combination schools are classified by predominate grade level. Head Start pupils are not included in this report except those in state supported units and included in the attendance reports as kindergarten. Only full-time instructional personnel were included in the report. Some teachers work in more than one school although they are full-time personnel; these teachers were reported as "itinerant" instructional personnel in Table 6. Employee data for non-instructional personnel, however, include part-time as well as full-time employees.

Tables 1-7 are a tabulation of the basic data obtained in a survey of the entire school system and include data for both pupils and employees. Tables 1, 2, 3, and 4, cover the elementary schools, junior high schools, senior high schools and special centers, respectively. Table 5 contains a summary of Tables 1-4. Table 5 reveals that total membership as of September 28, 1970 was 238,793^a. Of this number 59,818 (25.1%) were black and 49,379 (20.7%) were Spanish language origin pupils; an additional 184 American Indian and 481 Oriental pupils made 109,862 pupils in these four minority groups or 46% of the total membership. Table 6 covers central administration, district offices,

and countywide services, while Table 7 covers the adult education program. In addition to a breakdown of the numbers of pupils by schools into selected minority groups, percents are shown. For employed personnel, only the count of black and non-black employees at each location was tabulated.

Analysis of the basic data recorded in Tables 1-5 resulted in several comparisons and special listings which are included in Tables 8-11.

Table 8 reveals the exact extent of desegregation in each school. In this table the schools are listed by district as in Tables 1-5 but only black pupils were tabulated (by number and percent) with matching data from 1969 for comparison.

In Table 9 the percent of black pupils in each school is shown together with the percent of black pupils in each school in September 1968 and September 1969 facilitating a comparison of the three years on a school by school basis. Schools are listed in rank order based on the percent of black pupils in each school in September 1969. Whereas most of the schools show a small increase in the percent of black pupils enrolled while a few show a decrease from 1968 to 1969, many of the schools show a striking change in 1970 over the previous year.

Table 10 lists the schools in rank order based on the percent of black teachers in each school in 1969. The number and percent of black teachers are shown for both 1969 and 1970 to indicate the change brought about by the court ordered desegregation of teaching staff. The number and percent of white teachers are also shown.

The racial composition of the pupil population by districts for the six years of these desegregation reports beginning in 1965 is shown in Table 11.

^aItinerant pupils (391) and Miccosukee, a Federal Government Indian school (34 pupils), were not included.
